RNTL

SHARE THE SOUND

TEXT OPTIONS

The typefaces I have selected are angular and modern, aligning with the overall aesthetic of your app and complementing the product you are offering. They convey a futuristic and sophisticated tone. the angular and thick nature of the texts are futuristic and also mature.

2. RNTL (HORIZON)
3. RNTL (HK MODULAR)
4. RNTL (ALATSI)
5. RNTL (Alfa Slab One)

ACCOMPANYING TEXTS

I chose the following accompanying text fonts because they are simple to read and don't draw too much attention away from the more visually striking heading fonts. They pair well with the headings by providing a balanced contrast—clean, legible, and subtly contemporary in tone. Their understated design ensures clarity and readability across various screen sizes, while still maintaining a modern aesthetic that complements the overall visual identity of the app.

COLOUR SCHEME

For the app's color scheme, I aimed to capture the energy and atmosphere of a night out or party. I chose black for the background to reflect the typical setting of parties, which often take place at night or in dimly lit environments. White was selected for the body text to ensure high readability and strong contrast against the dark background. For the headings, I used vibrant blue and red tones to evoke the look and feel of neon party lights—adding a sense of fun, vibrancy, and color to the app's overall aesthetic.
